- Capacity: 88 bottles
- Antifrost cooling
- Sabbath mode function
- Control light indicator
- Interior LED lighting
- Three temp. zones with independent control
- 10 wooden slide-out shelves
- Self-supporting hinges

Features

This built-in wine cellar offers precise storage management with three adjustable temperature zones, ranging from +5°C to +20°C, allowing different types of wine to be preserved under optimal conditions. The three-layer glass door with anti-UV protection provides excellent protection against light exposure, helping to preserve the wine's quality and characteristics over time. The 10 beech wood shelves with full-extension telescopic runners ensure maximum convenience and optimal organization of the bottles. The dedicated shelf can accommodate up to 4 champagne bottles, while the fixed lower shelf provides additional storage space for further items. The internal LED lighting, selectable in three different colors: red, blue and white — allows you to customize the lighting effect and enhance your wine collection.
