FULGOR
MILANO

SINCE 1949

PASSIONE ITALIANA

FULGOR MILANO, draws its roots from the know-how of the area in which it was born and developed, from the desire to combine beauty and practicality, innovation with elegance, forms with the rigorous style of design that interprets and anticipates the needs of everyday life in a continuous way.

If new technologies are introducing new horizons and new opportunities, new demands and new satisfactions in everyday life, which nourish the need for change and improvement that is inherent in human beings; the ability to choose in overlapping proposals is the result of greater information and knowledge that the new technological tools allow to acquire in ever less time but with a greater breadth and depth.

The conviviality of our life must be ensured by beautiful, easy, simple and performing tools that allow us a greater availability of time for interpersonal relationships, to enjoy the presence of our family and friends sitting at a table to savour the results of our best culinary art.

This is why FULGOR MILANO offers more and more proposals for those who love to cook, to become the CHEF of their own home, and for those who love cooking intensively with the new CLUSTER CONCEPT series where, in addition to the technological content, new design solutions are offered to interpret those style and trends in continuous evolution, but with the aim of making them lasting over time.

Giovanni Buscetta

General Manager

FULGOR
MILANO

CLUSTER CONCEPT OVENS

The combination of the obsidian black of the glass and the brushed metal components of the control panel and the handle create a new symbiosis between two materials, as in the creation of a precious jewel.

FULGOR

CLUSTER CONCEPT

MULTIFUNCTION OVENS

FULGOR
MILANO

NEW INTERIOR

Ovens with the pyrolysis cleaning cycle have a new interior that includes three side light spots for flawless visibility.

HIGHER COOKING TEMPERATURE

To improve oven performances we have increased the maximum cooking temperature up to 290°C in the multifunction electronic self-cleaning model FCLPO 6215 P TEM BK.

COOL TOUCH DOOR

4 layers of thermo-reflecting glasses ensure the safety of a cool touch door while the oven is on - even at its highest temperature during the self-clean cycle.

SOFT CLOSING DOOR

Robust oven door with wide viewing windows get an assist from shock absorbing hinges, facilitating an effortless soft closing oven.

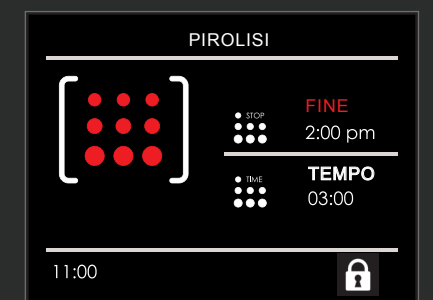

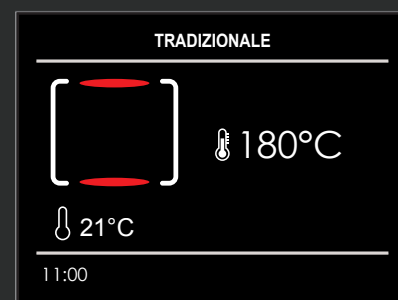

FULGOR
MILANO

CREACTIVE

THE OPERATING SYSTEM FOR ASSISTED COOKING

EXTENDED

No more uncertainties in choosing the most suitable cooking function for the dish to be cooked. Just select the recipe on the display and the oven will automatically start the most suitable cooking program. It is possible to change the recipes to set them to suit your needs by varying the weight and cooking time. This system improves performance by reducing energy consumption, while increasing cooking functions. Safer, also thanks to the automatic operating status control system that warns and prevents any damage.

MULTI COOKING LEVEL

The heat is distributed evenly inside the oven and remains constant, while the aromas of the different dishes remain separate thanks to the assisted ventilation system.

GRILL

The most effective way to brown the outside of a steak and a roast, while it is melted in its sauce to retain the degree of tenderness.

TRADITIONAL CUISINE

Perfect for optimal cooking, the flavours blend naturally with the heat evenly distributed in the oven.

PIZZA MODE 350°C

Simultaneously cook two pizzas of regular size in just two and a half minutes at a maximum temperature of 350° C.

CUSTOMIZABLE RECIPES

The cooking times and methods have been set into production, but it is possible to modify and customize the recipes to suit your needs.

SELF-CLEANING

The self-cleaning function by pyrolysis, selected directly on the display, consists in heating the inside of the oven up to very high temperatures (465°C) to burn off any residual fat or food in excess. At the end of the cycle it is enough to remove the resulting ash with a damp cloth without the use of detergents.

GAS HOBS

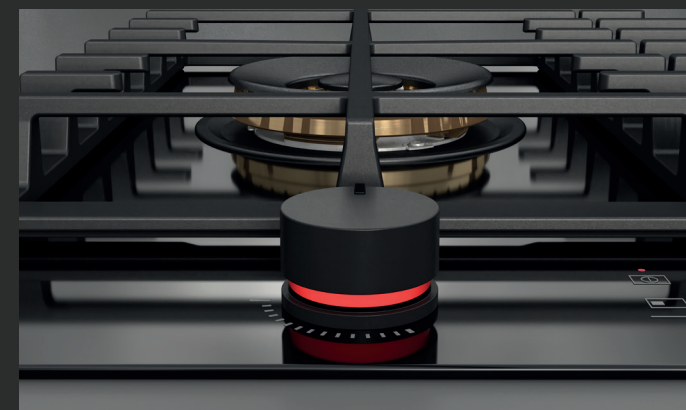

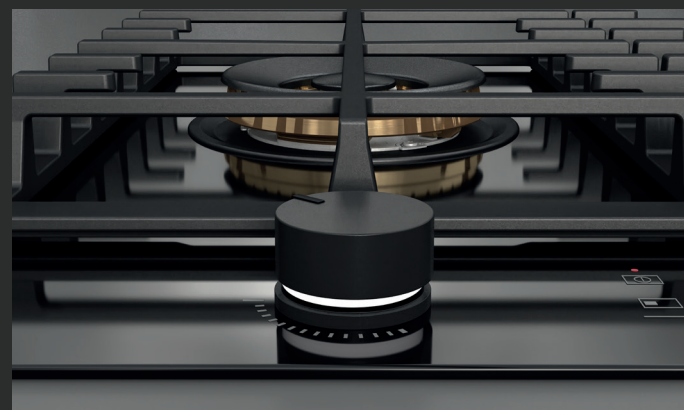

With sleek lines, ceramic surface, professional-grade cast iron pot rests over powerful brass burners, and LED illuminated controls, the CLUSTER CONCEPT cooktopS combines elegant design, responsive performance, and thoughtful convenience. New Halo VisionEffect knobs let you know at a glance if the gas is on or if residual heat is present, giving you peace of mind at every turn. Continuous cast iron rests offer an even cooking surface for easy movement of pans from burner to burner so that even your biggest cooking events can be handled with ease.

GAS HOBS HALO VISION

An innovation that allows the user to know at a glance whether the burner is lit by a white light around the knob (Halo Control) or if there is residual heat after use, through a red light around the knob (Halo Safe), for greater security and peace of mind when moving away from the kitchen.

GRIGLIE IN GHISA

Elegant Ceramic glass surface, professional-grade cast iron pot rests over powerful brass burners: the perfect synthesis between noble materials.

TIMER

You can set the timer, from 1 min to 2 hours, so the cooking zone will switch off automatically when the selected cooking time has elapsed.

INDUCTION HOBS

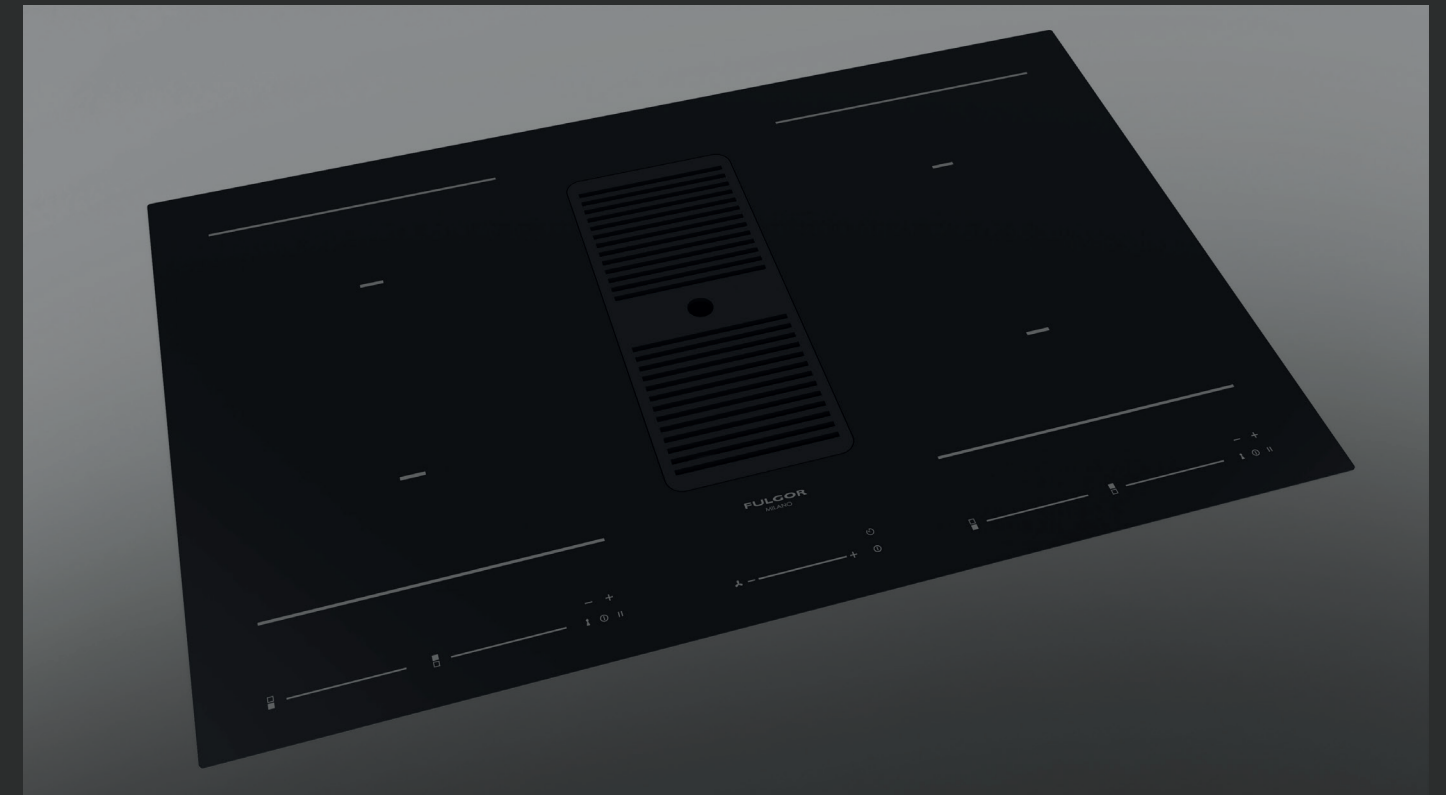

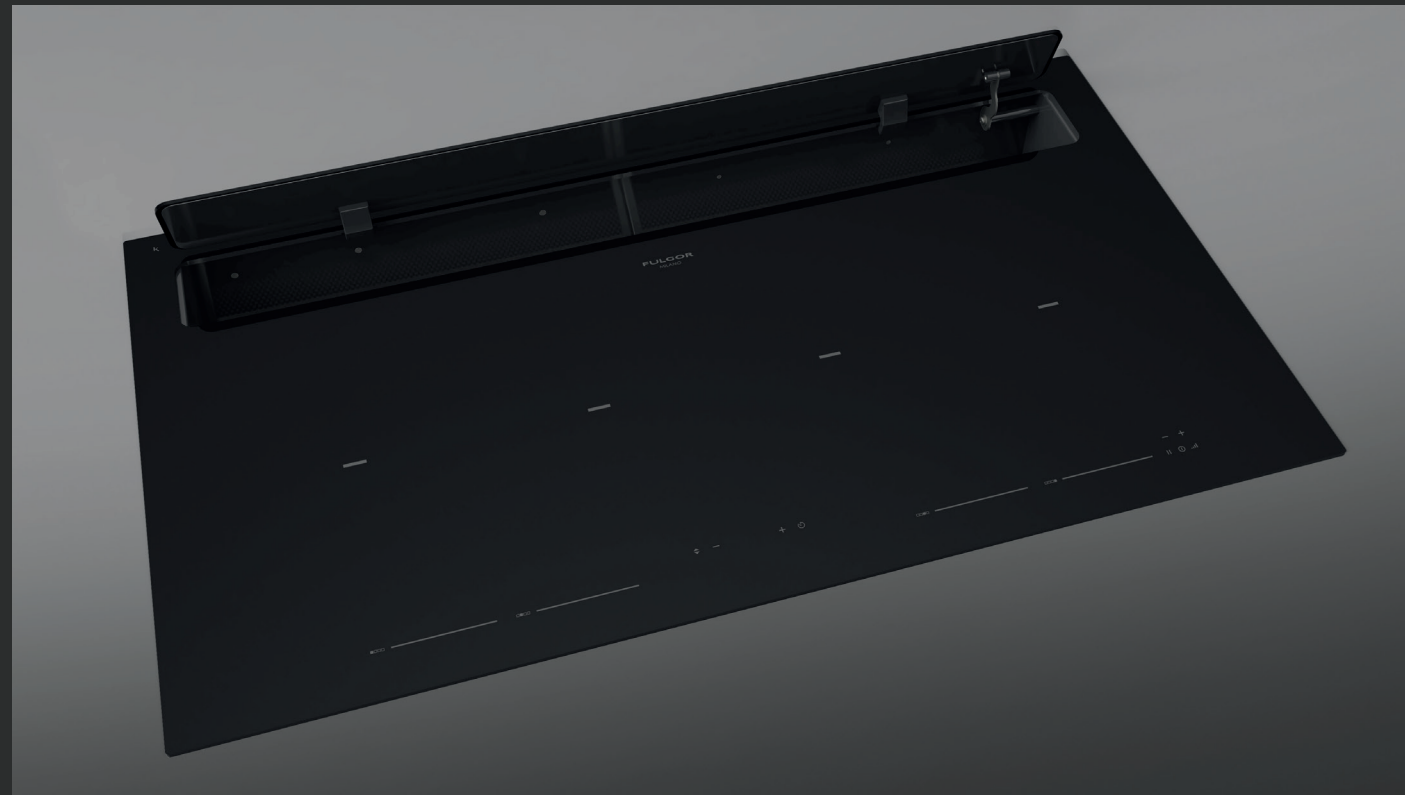

By generating a magnetic field that turns your cookware into the heating element, FULGOR MILANO highly efficient induction cooktops cook food twice as rapidly as with gas , all while saving energy. The results is an exceedingly safe, energy efficient way to cook- one that provides with an even greater control in the kitchen.

NEW

INDUCTION HOBS

FULGOR
MILANO

INTEGRATED VENTILATION

The ARIA+ models incorporate a high power and low consumption hood, for fumes and odours extraction while cooking. A Spacesaver new motor system has been integrated in the ARIA+ models.

PRE-SET TEMPERATURES

3 choices are available for each zone:
42 ° C melt condiments and chocolate
70 ° C slow cooking
90 ° C water boiling

FLEXI ZONE

All models include Flexi technology, which gives the freedom to combine more cooking zones into one. This means maximum versatility to express your culinary art.

POT DETECTOR - SAFETY

Once you switch on the hob – if there is already a pan on a cooking zone, the corresponding control element will be activated automatically. The size of the pan is also detected automatically to ensure particularly efficient energy usage.

HOODS

FEATURES

TOUCH CONTROLS

Light touch controls , conveniently positioned, allow you to quickly and efficiently adjust the multiple functions of the different models.

POWERFUL AIR OUTPUT

Energy efficient motors ensure powerful air output to FULGOR MILANO hoods, while equipped with flap protection against of cold air flow rerturn from the outside

LOW SOUND LEVEL

The robust construction of the hood chassis allows to reduce the vibrations produced by the vortex of the outgoing air, reaching low sound levels.

LED LIGHTING

Energy efficient LED lighting bar offers a perfect illumination of the cooking area below

RECIRCULATING CONVERSION

The option to convert the hoods from the vent to the recirculating version is available, by inserting an HP filter with high performance for filtering odors and fumes

The FCLHD 900 TC BK wall hood is proposed as a central element of the kitchen and is designed to integrate with the other elements of the CLUSTER CONCEPT series, offering new solutions for use, with touch control of the air speed levels that controls the motorized esextracting surface opening , according to the needs, that guarantees the removal of fumes, odours, excessive heat and humidity while cooking; it is completed by the auto-shutdown system after use and the indicator lights for filter replacement.

DECLARATION OF THE MANUFACTURER

The manufacturer declares that, depending on their type, the products in this catalogue conform to the fundamental requirements of European Directives and, for this reason, the product bears the CE mark, for which this declaration of conformity was issued and made available to market supervisory bodies.

DISPOSAL OF USED APPLIANCES

At the end of their useful life, these appliances may not be disposed of with normal urban waste, but must be delivered to a collection and recycling point for electrical and electronic equipment. This is indicated by the symbol shown on the product, in the instruction manual or on the packing materials. The materials used in this appliance can be reused in conformity with their intended use. Thanks to the reuse, recycling or other forms of recovery of unusable appliances, you will make a contribution to protecting our natural environment. You can obtain information about the disposal points for unusable appliances from your local authorities.
