FULGOR
MILANO

SINCE 1949

PASSIONE ITALIANA

FULGOR MILANO, with a more than 70 years long history, sinks deep its roots in the know-how of the territory where it has developed. Its leading principles are the will to marry beauty with practicality, innovation with elegance, form with precision, to meet the needs of our ever-changing everyday life.

Nowadays technologies have introduced a lot of new opportunities, new demands, but also improvements and ways to achieve the desired results, which meets the need for change and renovation so common in all human beings. The huge availability of information, something never seen before, has given you the freedom to choose between the different options with more awareness.

The heartiness and joyfulness of our lives are assured by the use of tools that are simple to use, efficient, and aesthetically pleasing at the same time. This will give us more time to spend with the people we love and in more meaningful activities. With our products, our goal is to enable you to experience the happiness of cooking, while enjoying the company of your family and friends, all gathered together to taste the masterpieces of your culinary art.

For this reason, FULGOR MILANO continues to offer more and more options for those who love cooking, for those who want to become chefs in their own homes, for those who are already professional cooks or enjoy the pleasures of outdoor cooking. We want not only to give you the best technologies available, but also products that follow the latest aesthetic trends, but that can be reliable and a point of reference in the years to come.

Giancarlo Menghini

URBANTECH OVENS

The URBANTECH product line marries the innovation of an essential design with a timeless traditional look. The concept behind URBANTECH can be summarized with just one sentence: Less is more...

Quoting Adolf Loos, a famous architect: "Be not afraid of being called unfashionable. Changes in the traditional way of building are only permitted if they are an improvement. Otherwise stay with what is traditional". This way of seeing things has inspired us to design a line of products where the spontaneity of a traditional knob control finds its complement in the presence of a digital display. A timer easy to set and read completes the features offered.

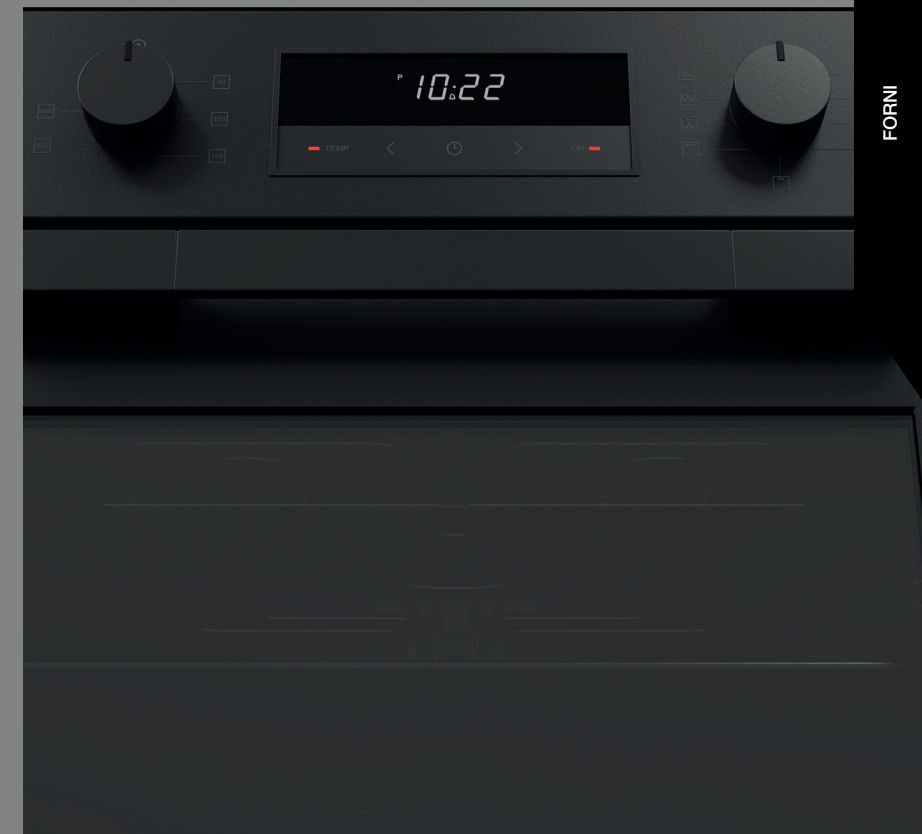

An exclusive Total Matte Black finish characterizes this product line together with the Fulgor Milano badge, beside the original and ergonomic URBANTECH handle. In the multifunction ovens, we could not have left out Soft Closing assisted system. You will also find the different cooking modes to allow you to express your creativity in the kitchen.

URBAN DESIGN

Thanks to its matte black finish, the URBANTECH line embodies a unique and essential design that will not go unnoticed.

WIDE RANGE OF PRODUCTS

A wide range of built-in ovens, allowing you to choose between different dimensions and types, including steam and microwave ovens.

NEW INTERIORS

The UltraBlack pyrolitic enamel, both for the oven interior and the accessories, makes cleaning a breeze. The self-cleaning version offers two-point interior lighting, for clear visibility during cooking.

INTEGRATED ELECTRONIC CONTROLS

For maximum versatility and simplicity, the URBANTECH ovens showcase the precision of their electronics with the comfort of a knob control. Using the different oven settings is thus made simple and immediate.

URBANTECH 75|90

NEW

FULGOR
MILANO

The URBANTECH multifunction ovens are also available in two special sizes: 75 and 90 cm wide. The extra-large oven interior capacity is about 89 and 105 litres, respectively. This overcomes the usual limits existing in kitchen appliances, allowing you to cook multiple dishes simultaneously.

The excellent hot air flow inside these ovens is achieved by using an advanced ventilation auxiliary system, making it possible for each of your delicacies to receive uniform heat, no matter how they are positioned inside your oven, always managing to produced the cooking results you desire.

URBANTECH WARMING DRAWER

FULGOR
MILANO

WARMING DRAWER

The warming drawer has a system of tangential ventilation that distributes the heat evenly on the inside. The knob temperature control is easy to locate and use. To avoid that your dishes move when opening or closing the drawer, there's a rubber mat that prevents them from moving.

STORAGE DRAWER

The storage drawer features a push/pull opening to ease its movements, thanks also to telescopic rails for total extraction. Inside, it's present a non-slip surface, easy to remove and clean.

GAS HOBS

We have used our professional know-how to offer you products that are both exclusive and worthy of admiration. These hobs showcase all brass burner rings that went through a distinctive process to make them have a matte finish (sandblasting). This makes them have an extraordinary resistance to wear and to color changes caused by high flames and heat. The cooking top finish has a special matte black enamel treatment to ease cleaning and to enhance its resistance to wear over time. The modern design of the knobs includes a bevel preventing overflow and the cast-iron grates have a continuous surface, granting safety and comfort while moving pans and pots across the surface. It also presents a thermocouple system to halt gas flow to prevent leakage. Hobs from this product line are available in different dimensions and burner arrangements, to meet any of your cooking needs.

NEW

GAS HOBS

FULGOR
MILANO

HEAVY-DUTY CAST-IRON GRATES

Its heavy-duty cast-iron grates make easy to move pans and pots accross its continuous surface.

DUAL WOK

High power central burner, versatile in its use thanks to the DUAL control which permits to modulate between different power levels, according to your specific needs.

MATTE BRASS BURNER RINGS

Matte brass burner rings do not only show an awesome design, are easy to clean, and offer long-lasting efficient performance, but also excel in durability and resistance against corrosion over time.

MATTE BLACK KNOBS

A perfect match for the URBANTECH hob design, the new black matte knobs are easy to use and offer a precise control over the cooking process.

INDUCTION HOBS

Fulgor Milano induction hobs belonging to this product line are made to stand out by their elegant glass-ceramic surface and exclusive Matte Black finish. This makes them be the perfect match for the other Urbantech products, with an essential and refined aesthetics. Latest technologies give you excellent performance with low energy consumption, reaching fastly high temperatures. Thanks to the Dual Max Power system, the central zone can be used with large pans to receive full power and consistent heat distribution while cooking. All models include Flexi technology, which gives the freedom to combine more cooking zones into one. This means maximum versatility to express your culinary art.

DECLARATION OF THE MANUFACTURER

The manufacturer declares that, depending on their type, the products in this catalogue conform to the fundamental requirements of European Directives and, for this reason, the product bears the CE mark, for which this declaration of conformity was issued and made available to market supervisory bodies.

DISPOSAL OF USED APPLIANCES

At the end of their useful life, these appliances may not be disposed of with normal urban waste, but must be delivered to a collection and recycling point for electrical and electronic equipment. This is indicated by the symbol shown on the product, in the instruction manual or on the packing materials. The materials used in this appliance can be reused in conformity with their intended use. Thanks to the reuse, recycling or other forms of recovery of unusable appliances, you will make a contribution to protecting our natural environment. You can obtain information about the disposal points for unusable appliances from your local authorities.
