## SOFIA 48" PRO RANGE

## SOFIA 48" PRO INDUCTION RANGE - ALL GLASS

L

### F6PIR487S1

#### SUMMARY DESCRIPTION

This elegantly designed 48" induction range is our first all-electric pro range alternative for those who do not have access to gas or choose to go full electric. The cooking surface features 7 powerful premium European inductors under a continues piece of ceramic glass adding to the elegant design. Not only does this layout feature the same beloved configuration of our 36" induction range but includes a dedicated bridge element, which when put into bridge function, allows one to combine both induction zones into one large zone for use with specialty cookware or an induction-capable griddle. The instant response and precise control of the induction are ensured by the presence of professional control knobs. Below the cooking surface, two self-cleaning true convection ovens with intuitive multiple baking and broiling functions and the convenience of telescoping racks encourage you to cook the way you want.

#### COLOR KIT

STAINLESS STEEL	GLOSSY WHITE RAL 9016
MATTE BLACK RAL 9004	MATTE WHITE RAL 9016
GLOSSY BLACK RAL 9004	MATTE GREY RAL 9007
GLOSSY RED RAL 3003	

#### **OPTIONAL ACCESSORIES**

Color kit	PDRKIT48
Standard trim	F6BG48STD
High back trim	F6BG48HBT
Island trim	F6BG48BCI
Telescopic rack	FMTRP30
Telescopic rack	FMTRP18

#### SPECIFICATIONS

#### **COOKING SURFACE**

Seven powerful premium European inductors 4 Single Induction cooking zones 1 Dual Max Power with Ø 11" cooking zone 2 Bridge Zone Elements (griddle function) Elegant Ceramic glass surface Booster function for each cooking zone Residual heat and Power-on Indicators Pot Detection System Child Lock Function Automatic Heat-up

#### OVEN

Dual True Convection in main oven and True Convection in accessory oven Self-cleaning oven with Multifunction baking Black Porcelain enamel interior Cool to the touch soft closing doors Extra-large baking cavity and viewing area 3 Halogen lights on main oven 2 Halogen light on accessory oven 2 Chrome racks per oven 1 Telescopic rack per oven 1 Meat probe Total capacity 123 lt and 63,4 lt Total capacity 4,34 cu. ft. and 2,24 cu. ft.

#### **OVEN FUNCTIONS**

Bake Broil Roast True Convection Warm / Proof / Dehydrate Meat Probe Self-Clean Sabbath Mode Convection Roast

## DIMENSIONS - CUTOUT REQUIREMENTS

Dimensions in brackets are in millimiters

## SOFIA 48" PRO INDUCTION RANGE - ALL GLASS

### INSTALLATION REQUIREMENTS

For detailed installation specifications consult the installation requirements page or each single product installation manual.

Ensure your installation also complies with local and national building and fire codes.

#### FLUSH ISLAND TRIM INSTALLATION

For island installation, maintain 2-1/2 inch minimum from cutout back edge of countertop and 3 inch minimum from cutout to side edges of countertop (see view).

Decreases by 1/2 Levels

	MANAGEMENT SYSTEM anagement Area		
A	Decreases by 4/5 Levels		

\*Considering all the power consuming features of this appliance; the theoretical potential cumulative power draw could exceed the required circuit breaker rating of 50 amps. We must stress that under normal expected daily usage, the probability of this ever happening is exceptionally low. Such a power draw would require that both ovens are operating and all surface elements have been set to their maximum settings simultaneously.

This model is equipped with a Fulgor Milano proprietary Power Management System that will prevent the tripping of circuit breakers in the event of an extreme power use scenario.

The system is designed so in the event that 50 amps total draw is exceeded for several minutes, it will enter into 'POWER MANAGEMENT' mode in which case 4 of the 5 surface induction elements of the main cooking area will be temporarily reduced in their setting in accordance to the above diagram and description: the rear inductors' settings will be reduced by 4 or 5 levels and the front inductors will be reduced by 1 or 2 levels.

The amount of reduction will be determined by the current power draw at the time the system is engaged. Additionally, any active BOOST and AUTOMATIC HEAT UP functions in this region will be turned OFF to reduce power draw.

You will note that the symbol 'POWER MANAGEMENT' will illuminate on the cooking surface during this time. Functionality of the ovens and of the two left-most induction elements will remain unaffected and the central double induction element will still be able to maintain a power level setting of 9.

Once the total power draw drops below 42 amps for 30 seconds, the cooktop will return to its full operational ability and previous settings will be restored automatically except for BOOST or AUTOMATIC HEAT UP which would need to be reinitiated if so desired. Again, it is highly unlikely you will ever see the Power Management system engaged during normal daily use.

Specification sheets are for planning purposes only. Always refer to installation instructions, always consult the countertop fabricator/ supplier prior to determining counter opening. Consult your HVAC engineer for your specific ventilation requirements. Always refer to installation instructions accompanying product or on available on **www.fulgor-milano.com/us/en** for your specific model number. Fulgor Milano retains the right to change product specifications or design without notice.
